Reader Response to the Literature Review Draft
I didn't used the title or abstract to answer questions.

1.   Identify the question that the literature review is seeking to answer.

What is the causes of America's decrease in outsourcing to India and what are the consequences as this continues to happen?

2.   On a scale of 1 to 10 (1 being hardest and 10 being easiest), how hard was it to identify the research question?

9 – First lines of introduction made it easy to find. Is it consequences for America or India?

3.   Identify the controlling statement (the answer or non-answer to the question).

More studies need to be done to determine what consequences India will experience.

4.   On a scale of 1 to 10 (1 being hardest and 10 being easiest), how hard was it to identify the controlling statement?

7 – I only found the answer to consequences in the conclusion and not the causes.

5.   Identify the organization of the literature review. What are the sections?

-Causes of Reshoring
        -India's Labor Laws
        -Labor costs
        -Increase transport costs
-Consequences of Reshoring
        -Decrease in Foreign Manufacturing
        -Decrease Manufacturing Profits
        -Efforts by India to save economy – (without reading anything wasn't sure what this
        sections was about)
-Conclusion

6.   On a scale of 1 to 10 (1 being hardest and 10 being easiest), how hard was it to figure out the organization?

9

7.   Identify the sources (citations) and tally up how often each source is used.

Admin (2017) - 1
Besley (2004) - 1
Exim (2014) - 1

Sharma (2017) - 2
Rohter (2008) - 2
Arun (2013) - 1
Kinkel (2014) - 2

8.   On a scale of 1 to 10 (1 being hardest and 10 being easiest), how hard was it to find the sources?

9 – References page was a little unorganized.

9.   Identify which sources (citations) agree with each other and which sources disagree with each other.

    (OECD, 2014) and (Besley and Burgess, 2014), (Admin, 2017) Agree that stringent labor laws legislation can do more harm than good.

    (FRPT, 2016) and (Sharma, 2017) agree that cost of labor is a problem.

I did not find any other comparisons

10. On a scale of 1 to 10 (1 being hardest and 10 being easiest), how hard was it to figure out the relationships among sources?

9

11. On a scale of 1 to 10 (1 being hardest and 10 being easiest), how hard was it to figure out what the graphics (tables, graphs, pictures, and such) were saying? If no graphics used, skip this question.

6

12. On a scale of 1 to 10 (1 being hardest and 10 being easiest), how hard was it to understand the technical terms that the literature review used? Assume the role of an educated non-expert.

7

13. Assume the role of a researcher. After reading this literature review, identify which areas of research you should pursue.

More studies conducted pertaining to the affects it has on individuals and employees in India.

14. On a scale of 1 to 10 (1 being hardest and 10 being easiest), how hard was it to find the suggestions for future research?

9
